

Fairfield AP Physics 2

Summer Reading

Read Chapter One of Richard Feynman's "Six Easy Pieces" (an extract from his famous "Lectures on Physics") entitled Atoms in Motion.

Write a 1-page (500 word) reflection on what you've read. Required elements include:

- One point which was covered that you already knew to be true.
- One misconception that was cleared up by this reading.
- Three remaining questions concerning the relationship between the behavior of materials at the atomic / molecular level and at the macro level (i.e., human scale).

To be turned in on the first day of class.
