## Fairfield Public Schools

## Enrollment Projections, Facilities, and Scenario Planning

February 13, 2018

## Agenda

## 1. Facilities

- Elementary Ed. Spec. (Holland Hill)
- Facility Capacities

2. Enrollment Trends

- October 1, 2017 Enrollment Projections
- Utilization

3. Scenario Planning

- 2015-16 Scenarios
- 2017-18 Scenarios

## Facilities and Capacity

## Elementary Ed. Spec. (Holland Hill)

An Ed. Spec is a detailed description of room sizes, uses, and design characteristics needed to achieve FPS's educational goals and objectives

## Instructional Spaces

4 Kindergarten classrooms
20 Grade 1 to 5 classrooms

## Support Services ${ }^{1}$

1 Instructional Improvement Teacher
1 School Psychologist
1 Social Worker
1 Teacher of Gifted Room
1 Math/Science Room
2 Language Art Specialist Rooms
1 Spanish Office
Nurses Facility
Large Conference Room

## Educational Spaces

Art Room with storage
Music Room with small group classroom
Media center with integrated comp lab

## Special Education ${ }^{1}$

4 Resource Teaching Rooms
2 Speech \& Language Rooms
1 OT/PT Room

## Other ${ }^{1}$

2 Staff workrooms

## Elementary Ed. Spec. (Holland Hill)

## Full-Size Classrooms

4 Kindergarten classrooms
20 Grade 1 to 5 classrooms
1 Math/Science Room
1 Music Room with small group classroom
1 Art Room with storage
1 Computer Lab ${ }^{1}$

24 K-5 instructional classrooms 3 to 4 other educational classrooms ${ }^{1}$

## Small Spaces

If small spaces are not available, these uses would occupy subdivided full-sized classrooms
4 Resource Teaching Rooms
2 Speech \& Language Rooms
1 OT/PT Room
2 Staff Workrooms
1 Instructional Improvement Teacher
1 School Psychologist
1 Social Worker
1 Teacher of Gifted Room
2 Language Art Specialist Rooms
1 Spanish Office
Large Conference Room

## 17 small spaces ${ }^{2}$

1. Computer lab only needed in a full-size classroom if not integrated with media center
2. Assumed that each school had a dedicated nurses facility and administrative office suite

## Elementary School Space Inventory

- Due to various ages of buildings and evolution of classroom needs, it is difficult to conduct an "apples to apples" comparison of school facilities
- Older school facilities need to be creative in space utilization in order to meet modern programming needs and Ed. Specs.
- Portable classrooms were not counted towards a facility's capacity

1. Based on the planned capacity from the new Holland Hill Ed Spec.
2. Does not include portable classrooms
3. Current Holland Hill school has 5 portables. New Holland Hill won't have any portables

* Small spaces vary in size

Includes districtwide programs such as PK, ECC, CLC, and other support services

## Burr Example

- Built in 2004
- Special education and support functions housed in small spaces designed for these uses
- Full size classrooms only used for grade level instruction and other educational uses (art, music, science, etc.)
- Aligns with Elementary Ed Spec.

## Dwight Example

- Built in 1962
- Fewer small spaces to house special education and support functions
- Full size classrooms used for grade level instruction, other educational uses (art, music, science, etc.), and some special education and support functions
- Needs to utilize full-size classrooms to align with Elementary Ed. Spec

## Mill Hill Example

- Built in 1955
- Fewer small spaces to house special education and support functions
- Full size classrooms used for grade level instruction, other educational uses (art, music, science, etc.), and some special education and support functions
- Portable classrooms
needed in order to align with Elementary Hill Ed.
Spec

## Elementary School Space Inventory

- Schools with adequate small spaces to meet the Elementary Ed. Spec
- Burr
- McKinley
- North Stratfield
- Riverfield
- Roger Sherman
- Stratfield
- Holland Hill (new)
- Schools where full-size classrooms are needed for support and special education spaces in order to meet the Elementary Ed. Spec
- Dwight
- Jennings
- Osborn Hill
- Schools where portable classrooms are needed in order to meet the Elementary Ed. Spec
- Mill Hill

## Mill Hill Construction Project

- Mill Hill is the only school that needs portable classrooms in order to meet the current Elementary Ed. Spec (Holland Hill)
- If the five portables were removed, Mill Hill's capacity would need be reduced from 378 students to 273 students in order to meet the Ed. Spec.
- The lack of support space at Mill Hill should be addressed and portable classrooms should be replaced with permanent space. This is necessary in order to operate Mill Hill as a 378 student school

## Comparison of Capacity Methods

## 2017 Capacity Methodology

- Educationally driven - Reflects desired deployment of space needed to meet the district's educational objectives
- Aligns with the Holland Hill Ed. Spec.
- Accounts for district wide programs (CLC, Pre-K, ECC, etc.)

2016 Capacity Methodology

- Physical space driven - Reflects physical capacity of each school building with adjustments made for portable classrooms - may not meet the district's educational objectives
- Does not align with the Holland Hill Ed. Spec.
- Does not take into account districtwide programs (CLC, Pre-K, ECC, etc.)

## K-5 Operational Capacity

| School | Total Full-Size Classrooms ${ }^{2}$ | Total Full-Size Instructional Classrooms | K-5 Grade Level Instruction | CLC | Pre-K ${ }^{3}$ | $K-5$ <br> Operational Capacity |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Roger Sherman | 24 | 22 | 22 | 0 | 0 | 462 |
| Stratfield | 27 | 24 | 22 | 0 | 2 | 462 |
| Total All Schools | 286 | 239 | 231 | 5 | 3 | 4,891 |

1. Based on the planned capacity from the new Holland Hill Ed Spec
2. The five portable classrooms were deducted from the capacity at Mill Hill
3. Pre-K classrooms are deducted from the $K$ - 5 operational capacity

Operational capacity = deployment of district-wide programs for the 2017-18 school year 128 seats lower than the theoretical capacity not including district behavior program

## Racial Balance

## Connecticut's Racial Balance Law

- Outlined in Connecticut General Statutes § 10-226
- Schools whose minority composition varies by $15 \%$ or more from the district's minority composition for the same grades are impending racial imbalance
- District is noticed by the state but no corrective action is necessary
- Schools whose minority composition varies by $25 \%$ or more from the district's minority composition for the same grades are considered racially imbalanced
- Districts with racial imbalances need to submit a plan to the CSDE addressing how imbalance will be corrected - Fairfield last updated their plan in 2016

## State Enrollment Trends

Public School Enrollment in Connecticut： 1960 to 2016

## Projections Primer

## Cohort Survival Method

- Based on Cohort Survival Methodology - Standard method for enrollment projections
- Methodology accepted by CSDE School Construction Projects (CGS 10-283)
- The Cohort Survival Methodology relies on observed data from the recent past in order to predict the near future
- Methodology works well for stable populations, including communities that are growing or declining at a steady rate
- Developed High (Maximum), Medium (Best Fit), and Low (Minimum) set of projections with different assumptions for births, housing markets, economic conditions, and in-migration rates

## Projections Primer

## Persistency Ratios

- Persistency ratios are calculated from historic enrollment data to determine growth or loss in a class as it progresses through school system
- Persistency ratios account for the various external factors affecting enrollments, including housing characteristics, residential development, economic conditions, student transfers in and out of the system, and student mobility
- Persistency Ratio of 1.0 means cohort size remains the same; 1.05 means the cohort size increases by 5\%, or a cohort of 100 grows to 105 the following year
- Changes in population, housing stock and tenure, and economic conditions help explain persistency ratios

－Relatively stable in－migration of between $0 \%$ and $1 \%$ over the last decade
－Decreasing number of births over the last decade，but a growing birth－to－k ratio
－Indicates a greater proportion of kindergarteners are being born outside of Fairfield than in the past

## Birth and Kindergarten Trends

- Kindergarten enrollment has declined by about $20 \%$ over the last ten years
- Corresponding birth cohorts have declined by $37 \%$ over the same time period
- Rising Birth-to-K ratio indicates that a growing proportion of kindergarteners who enroll in Fairfield Public Schools were born elsewhere

## Projections Assumptions

## High (Maximum)

Assumes immediate and sustained increase in home sales, rapid and sustained increase in births, and continued economic growth

## No observed conditions

 indicate these assumed improvements are likely- Assumes 23\% increase in births over the next 6 years
- Assumes 33\% increase in singlefamily home sales
- Assumes 30\% reduction in unemployment rate

## Medium (Best)

Assumes status quo - moderate home sales, modest growth in births, and stable economic conditions

## Best supported by

 demographic, economic, and housing data- Assumes $\mathbf{1 0 \%}$ increase in births over the next 6 years
- Assumes stable single-family home sales
- Assumes stable unemployment rate

## Low (Minimum)

Assumes decrease in home sales, stagnant births, and worsening economic conditions

## No observed conditions indicate these declines are <br> likely

- Assumes 5\% decrease in births over the next 6 years
- Assumes 20\% decrease singlefamily home sales
- Assumes 50\% increase in unemployment rate

## Birth Projections

High, medium, and low birth projections developed from regression models based on assumed unemployment rate and single-family home sales.

I. Based on the capacity of the New Holland Hill School (504 students)
*Opt-in program influences the accuracy of the individual school projections at participating schools

1. Uses capacity of new Holland Hill School at 504 students

- Overall utilization to remain between $85 \%$ and $90 \%$ over the next ten years - Utilization approaches $90 \%$ towards the tail end of the projections horizon
- Overcrowding to persist at Mill Hill and Roger Sherman

Medium (Best Fit) projections model
Capacity provided by FPS

* Assumes that Alternative High School enrollment remains the same as 2017-18 levels over the next ten years
- High school utilization is projected at or near 100\% beginning up to 2022-23
- Utilization to drop much faster at Fairfield Warde compared to Fairfield Ludlowe

## Scenario Planning

##  <br> 2015-2016 Scenario Planning

## Goal-

- Reduce McKinley's racial imbalance to below 20\% (Impending)

## Guiding Principles ${ }^{(1)}$ -

- Strive to maintain established neighborhoods and consider natural and manmade boundaries (rivers, highways)
- Consider the impact on busing and walkers
- Safety issues should be considered
- Phase out all temporary solutions (portables)
- Strive for sustained facility utilization at $90 \%$
- Siblings should attend same schools - avoid crossing feeder patterns
- Maintain District Guidelines for class size
- Create the least amount of disruption
(1) Adhoc Redistricting Committee- Redistricting: Guiding Principles
(Approved by BOE, November 17, 2015)

## 16 三両三吅吅 $^{39}$ <br> 2015－2016 Scenario Planning

－Conducted as part of the state－mandated FPS Racial Balance Plan
－Focus of scenario planning was to reduce racial imbalance at McKinley
－Two comprehensive redistricting scenarios were determined to be viable． Both require school construction projects at Holland Hill and Mill Hill to be completed at 504 students per school．
－Would require redistricting between $15 \%$ and $21 \%$ of elementary school students

## 2017-18 Scenario Planning

- In addition to addressing racial balance at McKinley, the 2017-18 was also focused on:
- Addressing overcrowding at Mill Hill and Roger Sherman
- Phasing out of all portable classrooms
- Assessing potential cost-savings measures in light of state budget
- Tested school closure, school pairing, pocket redistricting, and grade reconfiguration options

Scenarios are not recommendations, but are informational exercises meant to help the BOE assess feasibility of different actions and quantify impacts associated with those actions

## 2017-I8 Scenario Planning

Methodology and Assumptions

- All scenarios were tested using October 1, 2017 enrollment data students were reassigned to hypothetical boundaries
- Used operational capacity - the capacity for each school building that takes district-wide programs into consideration. Assumes all portables are taken off-line and all schools meet the Ed. Spec.
- Noted when CLC and Pre-K classrooms need to be shifted and which schools have the most space to house these programs
- Utilized new Holland Hill school capacity of 504 students 2017-I8 Scenario Planning

Several scenarios were evaluated but determined not to be feasible based on the ten-year enrollment projections

- Move $6^{\text {th }}$ grade down to the elementary schools - would result in elementary schools being over capacity
- Close a Middle School - not feasible based on ten-year enrollment projections
- Close a High School - not feasible based on ten-year enrollment projections
