RE: Guardian/Parent/Staff Notification
Asbestos Removal at Fairfield Ludlowe High School
Fairfield, Connecticut

Dear Concerned Parties:

Fairfield Ludlowe High School, located at 785 Unquowa Road in the Town of Fairfield is undergoing an addition and alteration project. This project is starting shortly and abatement is required. There are asbestos-containing materials that have been identified within the locations of the additions construction. These materials will be removed to facilitate the construction of the additions.

The intent of this letter is to inform you of the project to remove the asbestos. This abatement project is expected to start on Tuesday, January 20, 2015 and is expected to be completed Tuesday, February 10, 2015 (+/-).

The school will be partially occupied during the asbestos removal/clean-up in the addition areas. The portions of the school that are occupied will be separated from the asbestos removal project by sealed barriers to isolate the school from the work areas. The abatement work will take place during and after the school day, 6:30 a.m. to 10:30 p.m. The on-site project monitor will take air samples to verify that no fiber/dust particulate migrate to the occupied portion of the school.

The abatement will be performed by a state-licensed asbestos abatement contractor, Oscars Abatement, Connecticut Asbestos Contractor License # 03-786220, under contract to Fairfield Public Schools. The project will be monitored continuously by AMC Environmental, LLC an independent environmental consultant. The monitoring includes, but is not limited to, pre-work inspection, inspection and air sampling during the abatement process, final visual inspection, and final air clearance testing.

As required by the State of Connecticut Department of Public Health, this notification is being sent to all parents and guardians of the children/students, faculty, and staff of Fairfield Ludlowe High School. Any questions about the project can be directed to Salvatore Morabito, Manager of Construction, Security & Safety at (203) 255-7363.
