What Do We Do with the Leftovers?

1. The teachers are setting up the cafeteria for a dinner with parents. There are 100 parents who have returned RSVPs saying they are coming. Each table can seat 8 people. How many tables should be set up?

2. Fourth- and fifth-graders organized a bake sale. They made \$100. There are 4 fourth-grade classes and 4 fifth-grade classes. The classes want to share the money equally. How much should each class get?

3. The classes decide to use the money from the bake sale for a pizza party for the fourth and fifth grades. Pizzas cost \$8 each. How many can they buy with the \$100? Do you think that amount of pizza is enough?
