COURSE DESCRIPTION

AP Statistics is a rigorous course that offers advanced students an opportunity to do college level work in high school. Students will explore four broad conceptual themes: exploring data, planning a study, probability, and statistical inference. The content of the course requires students to use high level problem solving skills to analyze, describe and make conclusions about sets of data. AP Statistics is an excellent option for all students meeting the prerequisites, regardless of their intended college major. It is expected that students in this course will take the AP exam.

COURSE OBJECTIVES

Students should:

- Observe and describe patterns and departures from patterns.
- Plan and conduct a study using samples, experiments, and simulations.
- Explore random phenomenon using probability and simulation.
- Use statistical inference to make conclusions with confidence.
- Estimate population parameters and test hypotheses.

UNITS OF STUDY

- Exploring Data
- Planning a Study
- Probability
- Inference

COURSE POLICIES AND REQUIREMENTS

GRADING

Summative Assessments:	Insert % Here (Minimum of 70%). Insert Categories/Weighting (ie. Papers – 30%)
Formative Assessments:	Insert % Here (Maximum of 30%). Insert Categories/Weighting (ie. Quizzes – 50%)
Behavioral Characteristics:	Insert % Here (Maximum of 10%). Insert Categories/Weighting (ie. Particip. - 90%)
