

Brushing up on Essential Algebra Skills to get you ready for Geometry Summer Packet

(For students entering Geometry 21/22)

Students entering Geometry 21 and 22 should complete the problems in this packet before returning to school. **Students will be held responsible for reviewing these concepts by their Geometry teacher.** The first full day of school questions will be answered on the packet. The second class period an assessment on the packet will be administered.

Answers to all problems are included on the last page of this packet.

Need help on some of the topics? For each section a link to an instructional video has been provided!
