Modern Global Studies Grade 10

FAIRFIELD
PUBLIC SCHOOLS

Modern Global Studies: Description

Modern Global Studies is a continuation of the ninth grade offering that provides students with an exploration of global history from the late 18th century to the modern era. A critical study of history is emphasized through a conceptual examination of such themes as politics and government, religion, social structures, and economic motives. The culmination of the course is an examination of the consequences of globalization, and an emphasis on human rights. The curriculum is based on key compelling questions which require students to think critically, analyze and synthesize information, and make connections across regions and time periods while investigating issues from multiple perspectives. As students explore the larger concepts and themes of modern global history, they will continue to develop and apply the intellectual skills of social studies including critical reading, argumentative and informational writing, research, and document analysis.

Objectives and Standards:

Historical Understandings: Shown as content objectives, these goals define what students should know about global history upon completion of each unit. These understandings are drawn from the *Connecticut Social Studies Frameworks* (2015), with input from various other state frameworks, as well as the *National Standards for History* developed by the National Center for History in the Schools. These understandings represent the record of aspirations, accomplishments, and failures in global politics, economics, society, and culture. They also provide students with the historical perspectives required to analyze contemporary issues and problems confronting citizens today.

Historical Thinking / Inquiry Skills: These standards center on four dimensions driven by the use of questions to spark curiosity, guide instruction, deepen investigation, acquire rigorous content, and enable students to apply knowledge and ideas in real world settings so they can become active and engaged citizens. Drawn from the *Connecticut Social Studies Frameworks* (2015) and the *C3 Social Studies for the Next Generation National Framework* (2013), these standards enable students to evaluate evidence, develop comparative and causal analyses, interpret the historical record, and construct sound historical arguments and perspectives.

Modern Global Studies: Overview

Revolutions, Revolutionary Thought, and Global Impact

Overview

In this unit, the students will be exposed to the global influence of Enlightenment ideas on the modern era. Through studying several revolutions students will explore the potent ideas of popular sovereignty, inalienable rights, and nationalism that were key components of worldwide revolutionary movements. The translating of these ideas into political movements had the effect of mobilizing unprecedented numbers of ordinary people to participate in public life and to believe in a better future for all. Not only were political movements a significant component of this era, but also there was widespread social and economic change. Industrialization was a consequence of centuries of expanding economic activity around the world. Throughout this unit, students will understand the “isms” that have absorbed contemporary society - industrialism, capitalism, nationalism, liberalism, socialism, imperialism, and communism - by investigating these concepts within the historical context of the 18th and 19th centuries.

Unit Content Objectives

At the conclusion of this unit, students will be able to:

- Explain the causes and consequences of political/social revolutions in the eighteenth and nineteenth centuries.
- Analyze the patterns of nationalism, state-building, and social reforms in the eighteenth and nineteenth centuries.
- Examine the evolution and implementation of economic theories in the modern era.
- Synthesize major global trends to examine relationships among events in the eighteenth and nineteenth centuries.

Students will apply disciplinary concepts to investigate compelling questions such as:

- How did the French Revolution contribute to political and social transformations around the world in the eighteenth and nineteenth centuries?
- How did states in the western hemisphere establish independence in the eighteenth and nineteenth centuries?

A Half Century of Crisis and Achievement

Overview

In this unit, students will apply the impact of the mass social, political, and economic changes from the 19th and early 20th century to the emergence of global powers. Countries that successfully industrialized and achieved political stability sought to expand their power and influence throughout the globe, heralding in an emerging era of globalization. Mass production of new weaponry, coupled with the revolution of transport and communication, permitted this surge of power, thus enabling European powers to establish colonies around the world. The active responses of the peoples of Africa, Asia, and Latin America to the crisis of European hegemony are an important part of the developments of this era: armed resistance against invaders, collaboration or alliance with colonizers, economic reform or entrepreneurship, and movements for cultural reform. As World War I approached, accelerating social change and new efforts at resistance and renewal characterized colonial societies far more than consolidation and stability. The consequences of World War I set the stage for continued power struggles throughout the 20th century.

- Discuss and analyze the impact the Treaty of Versailles had on subsequent twentieth century upheaval.
- Evaluate how daily life around the world changed as a result of the evolving global community into the early part of the twentieth century.

20th Century Since 1939

Overview

In this unit, students will trace the development of the Modern World. Beginning with the horrors of World War II and the Holocaust, and culminating with the struggle for democracy, students will evaluate the efforts of various groups to secure human rights. World War II ended amid anxious hopes for genuine world peace. However, the hopes attached to the creation of the United Nations in 1945, were limited by the emergence of the Cold War. For forty years recurrent international crises and the doubtful consolations of mutually assured destruction dominated world affairs. In addition to studying the major policies of the superpowers, in this unit students will be exposed to the impact of the Cold War on the developing world through the period of decolonization. In this era, the European colonial empires were dismantled and power transferred to new nationalist leaders. The experience of these new leaders differed greatly, which in large part shaped the direction of these modern nations. When the Soviet Union collapsed, a new power structure emerged; one where new nations sought to expand their influence. Post-Cold War policies have had lasting consequences on geopolitics into the 20th and 21st centuries.

Unit Content Objectives

At the conclusion of this unit, students will be able to:

- Explain the causes and global consequences of World War II.
- Assess how post-World War II reconstruction led to a new international power structure.
- Evaluate the role of nationalism in the breakup of colonial empires.
- Analyze major shifts in world geopolitics between 1939 and the present.
- Explain how individuals or groups have worked to expand or limit citizens' rights.

Unit Compelling Questions

Students will apply disciplinary concepts to investigate compelling questions such as:

- How did fascist and authoritarian regimes seize power and gain mass support in the years following World War I?
- What political, economic, and social conditions led to the Second World War?
- How did World War II impact the international power structure and lead to Cold War tensions?
- How did global power shifts created by the Cold War impact developing states?
- What were the benefits and costs of ideological policies in post-World War II communist and capitalist states?
- What were the similarities and differences amongst nationalist movements in Africa and Asia post World War II?
- What impact did the end of the Cold War have on the international power structure? Is it still emerging?

The Modern World: Promises and Paradoxes

Overview

In the final unit of the course, students will use the knowledge they have built to help them examine both the promises and paradoxes of the modern world. The transformations that the world experienced in the previous three eras appear modest in comparison with the bewildering pace and complexity of change in the late 20th and 21st centuries. Despite the ruthless confrontations of local wars, terrorist assaults, and ethnic or nationalist feelings, the international community has continued to seek peace. The achievements and limitations of the post-World War II settlements, the United Nations, Middle East negotiations, and numerous other forms of international cooperation are all worthy of serious study for the lessons they may offer the coming generation. Many of the newer independent states have also faced daunting challenges in raising their peoples' standard of living while at the same time participating in a global economic system where industrialized countries have had a distinct advantage. The political, and in some places economic, reform movements that bloomed in Africa, Eurasia, and Latin America in the 1980s are evidence of the vitality of civic aspirations that originated more than two centuries ago. This is the world with all the promises and pitfalls associated with the past that our students will inherit; therefore this unit is essential for their global awareness.

Unit Content Objectives

- Analyze the impact of globalization on individuals and societies around.
- Examine the search for community, stability, and peace in an increasingly interdependent world.
- Analyze historical and contemporary examples of the efforts to ensure human rights at the national and international level.
- Examine and evaluate how ethnic, religious, economic, and political tensions continue to impact the modern world.

Unit Compelling Questions

Students will apply disciplinary concepts to investigate compelling questions such as:

- How has increasing economic interdependence transformed human society?
- Has the UN Declaration of Human Rights impacted the progress of human and civil rights around the world?
- To what extent have efforts to reduce tension and conflict in the contemporary world been successful?
- How are human rights values interpreted differently by various nations and cultures?
- What issues will continue to threaten peace and stability in the future?

Standards Emphasized in the Unit: Inquiry in the Social Studies
