

EDUCATIONAL SPECIFICATIONS FOR TWO RELOCATABLE CLASSROOMS HOLLAND HILL ELEMENTARY SCHOOL

Approved by BOE 3/15/2016

These “Educational Specifications” provide a narrative description of the project to provide two relocatable classrooms at Holland Hill Elementary School. These units would continue to permit the school to provide appropriate space for a variety of subjects. The process to acquire these relocatables must begin immediately in order to have them available for the next school year.

Following are subject and support areas typically housed in portable units due to the increased enrollment.

- Portable units will be used as regular teaching classrooms.
- Portable units will be used for special education programs.
- Portable units shall not contain bathroom facilities.

Educational specifications are required in support of Fairfield Public Schools application for a building grant to the Connecticut State Office of Schools Construction Grants. Although there is no guarantee of grant funding, our past experience has been to receive a reimbursement of approximately 26% of the eligible expenditures for construction projects.
