Connecticut Department of Public Health  
Radon Program  
Attn. Lynn Hudak

June 21, 2017

Dear Ms, Hudak.

Attached with this letter are most results for the recent follow-up test for Mill Hill Elementary school and Riverfield Elementary School – Fairfield, CT. Follow up testing was conducted at the below listed locations after adjustments were made to the existing air handling system. Follow-testing returned results below the Environmental Protection Agency action level of 4pCi/L at all locations.

- Riverfield Elementary School                      Gymnasium Office
- Mill Hill Elementary School                      Room 9, 10, 11, 14, Conference Room

No *School Mitigation Reporting Form* was filed with your department because the services of a radon mitigation professional was not retained for any corrective actions. Please advise if your department still requires a *School Mitigation Reporting Form* to be filed.

Sincerely,

A handwritten signature in black ink, appearing to read "Ted Tio", is written over a light blue horizontal line.
